GENERAL DESCRIPTION

This 15" bass loudspeaker has been designed to achieve a very light loudspeaker with superior technical specifications. Thus, the magnetic system incorporates a high energy neodymium magnet, reducing the total mass of the unit to less than 50% of a conventional ferrite model. Moreover, the heat dissipation has been improved with the use of extra-cooling. The 15LW30 incorporates a 3" voice coil made with high quality materials: round copper wire with high temperature bonding strength and polyimide former. The 15LW30 is highly recommended for those woofer applications that require a light and small loudspeaker with excellent technical specifications.

FREQUENCY RESPONSE AND DISTORTION CURVES

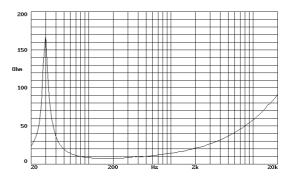

Note: on axis frequency response measured with loudspeaker standing on infinite baffle in anechoic chamber, 1w @ 1m.

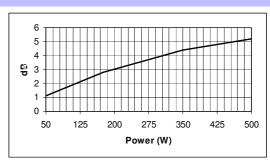

Note: Bass-reflex cabinet, Vb=60 I, fb=30 Hz

FREE AIR IMPEDANCE CURVI

POWER COMPRESSION LOSSES

Note: These losses are calculated from a five minutes AES power test applying band limited pink noise (25-1200 Hz). The loudspeaker is free-air standing.

MATERIALS

- **Voice coil:** round copper wire with high temperature bonding strength. Polyimide former able to withstand high temperatures.
- Cone: high stiffness paper cone.
- **Surround:** treated cloth to guarantee good retaining of elasticity in despite of continuing use.
- Spider: cotton spider.
- Metal parts: anti-corrosion coated parts designed to resist aggressive environmental conditions.
- **Basket:** specially designed die cast aluminium basket to avoid disturbing resonances.
- Magnet: high energy neodymium magnet.

Notes:

*The power capacity is determined according to AES2-1984 (r2003) standard.

Program power is defined as the transducer's ability to handle normal music program material.

**T-S parameters are measured after an exercise period using a preconditioning power test.

The measurements are carried out with a velocity-current laser transducer and will reflect the long term parameters (once the loudspeaker has been working for a short period of time).
